**4. FIRST AID MEASURES**

**Eye** None required.  
**Inhalation** If inhaled, remove from contaminated area. Apply artificial respiration if not breathing.  
**Skin** None required.  
**Ingestion** Not considered a potential route of exposure.  
**Advice to Doctor** Treatment for hyperoxia.

**5. FIRE FIGHTING MEASURES**

**Flammability** Non flammable - oxidising agent. May increase fire intensity. Do not expose to heat and ignition sources. May ignite in contact with incompatible materials. This material will not evolve hazardous products on decomposition.  
**Fire and Explosion** Temperatures in a fire may cause cylinders to rupture and internal pressure relief devices to be activated. This product will add fuel to a fire. Cool cylinders or containers exposed to fire by applying water from a protected location. Do not approach cylinders or containers suspected of being hot. Remove cool cylinders from the path of the fire if safe to do so. Ensure working area is well ventilated before re-use. Notify the manufacturer that you will be returning a faulty cylinder. Residual product will be disposed of when the cylinder is returned.

**Product Name**     **INSTRUMENT AIR**

**Extinguishing**     Use water fog to cool containers from protected area.

**Hazchem Code**     2T

## 6. ACCIDENTAL RELEASE MEASURES

**Spillage**            If the cylinder is leaking, evacuate area of personnel. Inform manufacturer/supplier of leak. Use personal protective equipment. Carefully move material to a well ventilated remote area, then allow to discharge. Do not attempt to repair leaking valve or cylinder safety devices.

## 7. STORAGE AND HANDLING

**Storage**            Do not store near sources of ignition or incompatible materials. Cylinders should be stored below 45°C in a secure area, upright and restrained to prevent cylinders from falling. Cylinders should also be stored in a dry, well ventilated area constructed of non-combustible material with firm level floor (preferably concrete), away from areas of heavy traffic and emergency exits.

**Handling**          Use of safe work practices are recommended to avoid inhalation. Do not drag, drop, slide or roll cylinders. The uncontrolled release of a gas under pressure may cause physical harm. Use a suitable hand truck for cylinder movement.

## 8. EXPOSURE CONTROLS/ PERSONAL PROTECTION

Exposure Stds	Ingredient	Reference	TWA		STEL	
			ppm	mg/m3	ppm	mg/m3
	Nitrogen	ASCC (AUS)	Asphyxiant			

**Biological Limits**   No biological limit allocated.

**Engineering Controls**   No special precautions are normally required when handling this product.

**PPE**                 Wear safety boots, leather gloves and safety glasses.

## 10. STABILITY AND REACTIVITY

**Chemical Stability**     Stable under recommended conditions of storage.

**Conditions to Avoid**   Avoid heat, sparks, open flames and other ignition sources.

**Material to Avoid**     Combustible materials such as oil and grease can spontaneously ignite at low temperatures in oxygen enriched atmospheres. Materials which burn in air, will burn more vigorously in oxygen enriched atmospheres. All non-metals must be oxygen compatible. Copper is most commonly used metal.

**Hazardous Decomposition Products**   This material will not evolve hazardous products on decomposition.

**Hazardous Reactions**   Polymerization will not occur.

## 11. TOXICOLOGICAL INFORMATION

---

<b>Health Hazard Summary</b>	Non irritant - non toxic gas. The respiratory and central nervous systems are primarily affected by gaseous oxygen. No health effects have been observed in humans exposed to concentrations up to 80 volume % oxygen for a few hours or up to 50 volume % for 24 hours. At pressures above 1 atmosphere hyperoxia may appear after 2 to 6 hours. Chronic exposure at normal or elevated pressure may cause severe thickening and scarring of lung tissues. Not carcinogenic or mutagenic.
<b>Eye</b>	Non irritant.
<b>Inhalation</b>	Non irritant. As the amount of oxygen inhaled is increased chest tightness, burning pains and coughing spasms will occur. Other symptoms of hyperoxia include cramps, nausea, dizziness, hypothermia, amblyopia (loss of vision), bradycardia, fainting spells and convulsions capable of causing death.
<b>Skin</b>	Non irritant.
<b>Ingestion</b>	Ingestion is considered unlikely due to product form.
<b>Toxicity Data</b>	No LD50 data available for this product.

---

## 12. ECOLOGICAL INFORMATION

---

**Environment** Not toxic to aquatic or terrestrial life.

---

## 13. DISPOSAL CONSIDERATIONS

---

**Waste Disposal** Cylinders should be returned to the manufacturer or supplier for disposal of contents.

**Legislation** Dispose of in accordance with relevant local legislation.

---

## 14. TRANSPORT INFORMATION

---

**Transport** Ensure cylinder is separated from driver and that outlet of relief device is not obstructed.
